

Diode detector, $f_c = 50$ kHz, 1 kHz tone, $\mu = 0.8$: clipping limit $RC \leq 119 \mu\text{s}$

$RC = 8 \mu\text{s}$: too short (ripple)

$RC = 60 \mu\text{s}$: about right

$RC = 500 \mu\text{s}$: diagonal clipping
